

Department of Mathematics, BGU

Colloquium

On Tuesday, December ,8 2015

At 14:30 – 15:30

In Math 101-

Eitan Sayag (BGU)

will talk about

Recent Developments in analysis on Spherical spaces

Abstract: I will overview recent developments in harmonic analysis on spherical spaces. This class of spaces includes the class of symmetric spaces and recently became relevant for variations on the Langlands program due to its relation to periods of automorphic forms.
