

Department of Mathematics, BGU

Model theory working seminar

On Wednesday, December 3, 2025

At 12:10 – 14:00

In Room 4

Moshe Kamensky

will talk about

Some model theory of rational dynamics

Abstract: I will give an overview of some recent and some older results on rational dynamics and on rational difference equations. The main model theoretic tool here is the theory ACFA, the model companion of the theory of difference fields.
