

Department of Mathematics, BGU

Model theory working seminar

On Wednesday, December ,17 2025

At 12:10 – 14:00

In Room 4

Moshe Kamensky

will talk about

Internality and higher internality

Abstract: I will provide an overview of the model theoretic notions of internality and internal covers, and their relation to definable groupoids. I will then indicate a generalization of these notions to higher homotopical dimension
