Algebraic Geometry and Number Theory

On Wednesday, March ,29 2017

At 15:10 – 16:30

In *Math* 101-

Billy Woods (BGU)

will talk about

Iwasawa Algebras

Abstract:

Ben Gurion University - Mathematics Algebraic Geometry and Number Theory Seminar

Speaker Billy Woods (BGU)

Title Iwsasawa Algebras

Date Wednesday, 29 March 2017

Time 15:10 - 16:30 (starts 15:10 sharp)

Location Room -101 in Building 58

An Iwasawa algebra is the completed group algebra kG of a compact p-

adic analytic group G, over an appropriate (usually profinite) commutative ring k. These form a large class of rings with nice

Abstract properties: for example, they are semilocal and noetherian. I will

define these objects, briefly outline how and why they arose (in their commutative form) in number theory, and then explain some of what is

known about their algebraic properties.
