

BGU Math

Colloquium

2016–17–B meetings

Date	Speaker	Title
Mar 21	Yosif Polterovich (Université de Montréal)	Sloshing, Steklov and corners
Mar 28	Vitali Milman (Tel Aviv University)	Some Fundamental Operator Relations in Convex Geometry and Classical Analysis
Apr 4	Victor Abrashkin (U. of Durham)	Galois groups of local fields, Lie algebras and ramification
Apr 25	Inna Entova-Aizenbud (BGU)	Stability in representation theory of the symmetric groups
May 9	Jozsef Solymosi (UBC)	Geometric methods in additive combinatorics.
May 16	Jon Aaronson (Tel Aviv University)	Rational ergodicity and distributional limits of infinite ergodic transformations.
Jun 6	Ishai Dan-Cohen (BGU)	A fundamental group approach to the unit equation
Jun 13	Klaus Künnemann (Universität Regensburg)	The Calabi-Yau problem in archimedean and non-archimedean geometry
Jun 20	Arkady Poliakovsky (BGU)	Jumps detection in Besov spaces via a new BBM formula. Applications to Aviles-Giga type functionals

Jun 27	Yair Glasner (BGU)	Invariant random subgroups in combinatorics, dynamics and representation theory
--------	--------------------	---

Meetings are on TUESDAYS, 14:30-15:30, in **Math -101** (unless otherwise mentioned)
