# The Department of Mathematics 

2019-20-A term

Course Name Calculus B1
Course Number 201.1.9141
Course web page
https://www.math.bgu.ac.il//en/teaching/fall2020/courses/calculus-b1
Lecturer Prof. Fedor Pakovich, [pakovich@bgu.ac.il](mailto:pakovich@bgu.ac.il), Office 310
Office Hours https://www.math.bgu.ac.il/en/teaching/hours

## Abstract <br> Requirements and grading

## Course topics

. 1 Introduction to number theory. Intervals and segments. Concept of a function. Elementary functions. . 2 Limit of a function.3. Continuity and discontinuity of functions.4. Derivative and dffierential. Basic derivatives. Dffierentiability and continuity. Linear approximation by dffierentials. Highorder derivatives. The fundamental theorems of dffierentiation and their applications. L'Hopital's theorem and its application to calculation of limits.5. Taylor's polynom. Expansion of functions into Taylor's and McLoran's series. Expansions of some usage functions. Application of Taylor's and McLoran's polynoms a) to approximate calculations, and b) to calculation of limits.6. Investigation of a function. Extremal points. Necessary and sufficient conditions for extrema. Max. and min. of a function within a segment. Convexity and concavity, inflection point. Asymptotes. Graph construction.7. Primitive function and indefinite integral. Table integrals. Calculation of indefinite integrals by decomposition, by parts, by substitution. Integration of rational and trigonometric functions.8. Definite integrals. Reimann's sum. The fundamental theorem. Formula of NewtonLeibnitz. Calculation of definite integrals. Integration by decomposition, by parts, by substitution.9. Use in definite integrals to calculation of areas,
