

The Department of Mathematics

2023–24–A term

Course Name Expander graphs and expansion in groups

Course Number 201.2.0411

Course web page

<https://www.math.bgu.ac.il/en/teaching/fall2024/courses/expander-graphs-and-exp>

Lecturer Prof. Izhar Oppenheim, <izharo@bgu.ac.il>, Office 316

Office Hours <https://www.math.bgu.ac.il/en/teaching/hours>

Abstract

Requirements and grading¹

Course topics

- .1 Expander graphs and their applications – Equivalent definitions, Mixing Lemma, Alon–Boppana Theorem, Applications, Constructions
- .2 Kazhdan Property (T) - group representations (short intro.), Cayley and Schrier graphs, Property (T) – definition and properties, examples, construction of expander graphs via property (T)
- .3 Additional topics (as time allows)

¹Information may change during the first two weeks of the term. Please consult the webpage for updates
