

The Department of Mathematics

2018–19–B term

Course Name Differential Calculus for EE

Course Number 201.1.9671

Course web page

<https://www.math.bgu.ac.il/en/teaching/spring2019/courses/differential-calculus-for-ee>

Lecturer Dr. Avi Goren, <gorenav@post.bgu.ac.il>, Office מיונס 110

Office Hours <https://www.math.bgu.ac.il/en/teaching/hours>

Abstract

Requirements and grading¹

Course topics

- .1 Real numbers. Supremum and Infimum of a set. .2 Convergent sequences, subsequences, Cauchy sequences. The Bolzano-Weierstrass theorem. Limit superior and limit inferior. .3 Series. Partial sums, convergent and divergent series, Cauchy criterion. Series of non-negative terms. The root and the ratio tests. Conditional and absolute convergence. The Leibnitz test for series with alternating signs. Rearrangements of series (without proof)
- .4 The limit of a function. Continuous functions. Continuity of the elementary functions. Properties of functions continuous on a closed interval: boundedness and attainment of extrema. Uniform continuity, Cantor's theorem. .5 The derivative of a function. Mean value theorems. Derivatives of higher order. L'Hospital's rule. Taylor's theorem. Lagrange remainder formula.

¹Information may change during the first two weeks of the term. Please consult the webpage for updates
