

## The Department of Mathematics

2020–21–B term

**Course Name** Calculus 2 for Biotechnology

**Course Number** 201.1.9571

**Course web page**

<https://www.math.bgu.ac.il/en/teaching/spring2021/courses/calculus-2-for-biotechnology>

**Lecturer** Dr. Matan Ziv-Av, <matan@post.bgu.ac.il>, Office מִינוֹס 123

**Office Hours** <https://www.math.bgu.ac.il/en/teaching/hours>

### Abstract

### Requirements and grading<sup>1</sup>

### Course topics

Analytic Geometry: planes and lines, quadric surfaces, cylinders. Vector functions: derivatives and integrals. Partial derivatives: functions of two or more arguments, chain rules, gradient, directional derivatives, tangent planes, higher order derivatives, linear approximation, differential of the first and higher order, maxima, minima and saddle points, Lagrange multipliers. Multiple integrals: double integrals, area, changing to polar coordinates, triple integrals in rectangular coordinates, physical applications. Vector analysis: vector and scalar fields, surface integrals, line integrals and work, Green's theorem, the divergence theorem, Stokes's theorem. Infinite series: tests for convergence of series with nonnegative terms, absolute convergence, Alternating series, conditional convergence, arbitrary series. Power series: power series for functions, Taylor's theorem with remainder: sine, cosine and  $e$ , logarithm, arctangent, convergence of power series, integration, differentiation.
