Abstract

Requirements and grading[1]

Course topics

.1 Fields: the definition of a field, complex numbers.

.2 Linear equations: elementary operations, row reduction, homogeneous and non-homogeneous equations, parametrization of solutions.

.3 Vector spaces: examplex, subspaces, linear independence, bases, dimension.

.4 Matrix algebra: matrix addition and multiplication, elementary operations, the inverse matrix, the determinant and Cramer's law. Linear transformations: examples, kernel and image, matrix representation.
