אוניברסיטת
בן-גוריון בנגב

The Department of Mathematics
2023–24–B term

Course Name Introduction to computers to Computer science

Course Number 361.1.3301

Course web page
    `https://www.math.bgu.ac.il//en/teaching/spring2024/courses/`
    `introduction-to-computers-to-computer-science`

Office Hours `https://www.math.bgu.ac.il/en/teaching/hours`

Abstract

Requirements and grading[1]

Course topics

.1 Introduction: overall description of the multi-purpose digital computer operation, the central processing unit (CPU) organization, representation and processing of information (data and programs).

.2 Machine language: representation of operations and commands, selecting the command set, designing the command architecture, addressing modes.

.3 Control Unit: application methods by logic and micro-programming, interpretation and execution of command set.

.4 Arithmetic Unit: numbers representation, basic arithmetic operations in digital systems, addition, subtraction, multiplication and division of fix and floating point numbers.

.5 Memory Unit: memory types, addressing methods, memory organization, virtual memory, cache memory.

.6 Input/Output Unit: I/O addressing modes, I/O data transferring control by serial polling, interrupt and direct memory access (DMA).
