random ballistic strongly for theorem limit Local environments random in walk

תינתן על-ידי

Zurich) (ETH Rosenthal Ron

תקציר: We study the random walk model in random environments. We prove (T') condition ballisticity Sznitman's under higher and four dimension existence the also and model the for Theorem Limit Central local a of version a of view of point the to respect with invariant is which measure equivalent an of Cohen. Moran and Berger Noam with work joint a is This particle. the
