Department of Mathematics, BGU

Combinatorics Seminar

On *Monday, April ,16 2018*

At *14:10 − 15:10*

In *101-*

Charles Wofl

will talk about

Applications of the Container Method

Abstract: The Container Method, developed in 2015 by Balogh-Morris-Samotij and Saxton-Thomason, has produced numerous applications in combinatorics. We will discuss applications to triangle free graphs and an Erdos discrete geometry problem.
